iD14

A super-compact powerhouse

Employing a single, 4-inch coaxial driver, the super-compact ID14 might be the smallest loudspeaker that NEXO has ever built, but it punches well beyond its size and weight with the signature NEXO performance of powerful and dynamic full range sound. Equally at home in a hospitality environment or as part of sophisticated, immersive sound system, the ID14 features optional HF directivity and a myriad of mounting and connecting options, and finishes, delivering uniform audience coverage with low visual impact, indoors or out.

With a shared sonic signature, ID Series s sonic experiences in the most c

iD24

Thrilling sound, venue-wide

With two 4-inch drivers in a unique V-formation and a user-rotatable horn for variable HF dispersion, the ID24 continues the theme of combining powerful, full range performance from a compact cabinet with unprecedented levels of versatility and flexibility for system designers and installers. NEXO NXAMP and DTDAMP power and processing solutions include presets for all ID24 horn settings – and all other ID Series cabinets, making it easy to configure high-performance systems in complex, zoned environments, ensuring consistently superior sonic experiences for visitors as they move throughout the venue.

iD84

Taking the column speaker to new heights

NEXO's ID84 supercharges the concept of the column loudspeaker,
expanding its role beyond traditional voice reproduction into powerful,
high-quality music applications. Suddenly, venues like sports stadia and
transport hubs can both inform and entertain visitors with thrilling and
immersive audio experiences, and develop new revenue models with
new types of content. And NEXO innovation extends way beyond sonic
performance, as the ID84 also sets new standards in visual design, ease of
installation and versatility of deployment.

# Precision Sound

Right where it's needed

When it comes to creating the perfect immersive audio experience, directivity control is key to the superior performance of NEXO's compact ID Series speakers.

iD14

Optional dispersions

Used as a standalone speaker, partnered with the IDS108 sub or as part of a larger system with other ID Series speakers, the ID14 delivers powerful, full range sound from an exceptional compact form factor. To ensure perfect coverage in every application, the ID14 is available in two different HF coverage options: the standard 100°x100° horn, or an asymmetric version offering 90°x140° dispersion.

NXAMPMK2 power and processing provides dedicated presets for both horn options.

100°

100°   100°

100°

90°

140°   140°

90°
iD24

User-rotatable horn

The ID24 features a unique user-rotatable horn that lets users quickly select between 120° x 40° or 40° x 120° HF coverage, bringing unparalleled flexibility to the world of compact speakers. You don't even have to remove the grille or open the cabinet. And the versatility of the ID24 is further enhanced by a selection of horn options with dispersions including 60° x 60°, 90° x 40°, 120° x 40° and 120° x 60°.
iD84

Switchable vertical directivity

The ID84 features a unique and easy to use system for changing vertical high frequency dispersion. A switch on the rear of the cabinet controls a passive filter which effectively changes the delay settings of the dome tweeter array at the top of the cabinet which, in turn, switches the HF vertical dispersion from broad (0˚ to -25˚) to narrow (0˚ to -10˚). The facility to create longer columns by joining cabinets vertically provides additional control over LF directivity (see page 8), resulting in a column speaker that's uniquely adaptable for its environment and application.

iD 84

IP54 Rated
Installation versions of ID84 cabinets can be specificed in any RAL colour and are IP54-rated for use in outdoor applications.
Column speaker

Measuring 150mm wide x 215mm deep x the standard 1m high (39.0" x 5.9" x 8.5") and weighing 15kg (33lbs), the ID84 uses eight 4 inch drivers and an array of dome tweeters on a curved baffle in a light weight aluminium cabinet with a rigid steel spine. The choice of dome tweeters over a conventional HF compression driver results in particularly low levels of distortion and contributes to a 'hi-fi' performance that extends the ID84's suitability well beyond the traditional column speaker role of voice reproduction into music applications. The ID84 achieves a frequency range of 90Hz to 20kHz with a peak SPL of 136dB. The unique directivity switch on the rear panel enables instant switching of vertical HF dispersion, and cabinets can be linked 'end-to-end' to create longer columns. Multiple rigging options and a comprehensive range of accessories make it easy to deploy the ID84 in a wide range of fixed installations and mobile applications.

Using an array of dome tweeters rather than an compression driver significantly lowers HF distortion and gives the ID84 a 'hi-fi-like' sonic character.

ID84 Touring, Install, TIS and Low-Extension Models

Also available, the ID84L is an LF extension version of the ID84, identical in every way but without the dome tweeters. Touring versions of both models feature Magnelis steel grilles. Installation versions use an acoustic cloth over the front of the grilles. The TIS version is actually a Touring version plus the acoustic cloth in front. All versions are available in black, white or custom RAL colour on request. Connectivity on the Touring versions is via a Speakon connector on the rear plate, while Installation versions use a cable gland with a 2 core cable for audio input, ensuring IP54 protection.

Install connector

Touring connector

ID84-T   ID84-I

Installed Systems

Wall mounting

ID accessories make it easy to wall-mount ID84 columns.

Rigging

A small bumper can fixed to the top of the cabinet for hoist-mounting.

Mobile Applications

ID84 connector plate

IDS312 connector plate

Pole mounting

ID84s can be pole mounted on a base board to create an elegant, freestanding system.

Rigging clamp

Rigging clamps are available for truss-mounting.
Sub mounting

An ID84 on a IDS312 sub creates a powerful, but visually unobtrusive FOH system.

Floor mounting

Adding an ID84L beneath the main ID84 cabinet creates a visually appealing and highly-effective full-range system.

IDS312 Subs

A dedicated 3 x 12" sub features a convenient system for mounting and connecting an ID84 cabinet on top, extending system LF response down to 40Hz and creating a full range system that's 2m in height. The IDS312 also features rubber strips to isolate vibration in horizontally-mounted applications.

4 columns

Instant cabinet coupling

A dedicated coupling bracket is used to join cabinets to create longer columns. ID84 cabinets are joined with the top cabinet inverted, such that tweeters are close-coupled for uncompromised high frequency performance.

iD24

Compact speaker

Measuring 132mm x 309mm x 233mm (5.2" x 12.2" x 9.2") and weighing 6kg (13lbs), the ID24 uses twin 4 inch drivers in a V formation in a robust Polyurethane cabinet and achieves a frequency range of 95Hz to 20kHz with a peak SPL of 126dB. The unique, user-rotatable horn can be used to quickly select a range of HF directivity options, ensuring that horizontal and vertically mounted cabinets can be matched precisely to the application, with a dedicated preset for each horn option in the NXAMP powered controller to ensure perfect coverage at any frequency. Multiple rigging options include threaded M10 on Install models and rigging points on touring versions.

IP54 Rated
Installation versions ID24 cabinets can be specificed in any RAL colour and are IP54-rated for use in outdoor applications.

ID24 Touring, Install and A La Carte Models

Touring versions of the ID24 feature Magnelis steel grilles and are available in black, white or custom RAL colours. Installation and Carte versions use an acoustic cloth over the front of the grilles and are also available in black, white or custom RAL colours. Connectivity on the Touring versions is via two Speakon connectors on the rear plate, while Installation and Carte versions use a cable gland with a 2 core cable for audio input, ensuring IP54 protection.

ID24-T   ID24-I   ID24-C

Install connector

Touring connector

Installed Systems

Horizontal mounting

Compact and powerful, ID speakers and subs are ideal for discreet horizontal placement, bracketed to walls or ceilings.

Vertical mounting

With innovative V formation drivers, ID24 is equally at home mounted horizontally or vertically.

Bracket mounting

The U-Bracket can be used to mount ID24 to a variety of structures and surfaces.

Under balcony

Ideal for theatre applications, ID24 units can be used under balconies to reach the audience areas that the main system does not cover.

Mobile Applications

Stage front-fill

Use ID24 to 'beam' sound into the first rows of the audience from the stage, ensuring total coverage and the best listening experience throughout a venue.

Pole mounting

For touring applications, ID24 can be quickly and easily pole-mounted using the optional IDT-TVP mounting bracket.

Flown and wedge

For live sound applications, ID24 is a single box solution that can be flown or even used as a wedge thanks to its innovative angled design.

IDS110-T/ IDS110-I

IDS110/210 Subs

Dedicated 1x10" and 2x10" subs are available, extending ID24 system LF response down to 43Hz. With a low-profile, sleek design, IDS110 and IDS210 subs are easily installed discretely in a wide range of locations - within walls, staircases, under furniture and more. Available in Touring and Install versions, the IDS110 measures 285mm x 525mm x 550mm (11.2" x 20.7" x 21.7") and the IDS210 measures 285mm x 525mm x 550mm (11.2" x 20.7" x 21.7").

IDS210-T / IDS210-I

IP55 Rated
Installation versions ID14 cabinets can be specificed in any RAL colour and are IP55-rated for use in outdoor applications.

iD14

Super-compact speaker

Measuring just 130mm x 130mm x 120mm (5.1" x 5.1" x 4.7") and weighing only 1.7kg (3.7lbs), the ID14 employs a single custom-designed coaxial driver in a robust Polyurethane cabinet. Despite its super-compact size, the ID14 achieves a full frequency range of 120Hz to 20kHz with a peak SPL of 116dB. Thanks to its fully symmetric design, there are no left or right version of the ID14, so all speakers in the inventory are the same. A choice of directivity options ensures that cabinets can be matched precisely to the application, with a dedicated preset for each horn option in the NXAMP powered controller to ensure perfect coverage at any frequency. Multiple rigging options are provided by a threaded M10 on each side of the cabinet, and two M6 inserts with a 73mm pitch on the back.

ID14-C

ID14-I

ID14-T

ID14 Touring and Install Models

Touring versions of the ID14 feature Magnelis steel grilles and are available in black, white or custom RAL colours. Installation versions use an acoustic cloth over the front of the grilles and are also available in black, white or custom RAL colours. Connectivity on the Touring versions is via two Speakon connectors on the rear plate, while Installation versions use a cable gland with a 2 core cable for audio input, ensuring IP55 protection.

Install connector

Touring connector

Installed Systems

Wall mounting

M6 inserts with a 73mm pitch are ready to receive NEXO wall mounting accessories.

Sub mounting

The ID14 can also be mounted directly onto the IDS108 sub.

Bracket mounting

The U-Bracket can be used to mount ID14 to a variety of structures and surfaces.

Mobile Applications

Pole mounting

The ID14 can be pole-mounted on the IDS108 sub for mobile applications.

Mic stand mounting

A threaded M10 on each side of the ID14 enables mounting on a microphone stand.

Stage front-fill

Use ID14 to 'beam' sound into the first rows of the audience from the stage, ensuring total coverage and the best listening experience throughout a venue.

IDS108 Subs

Measuring 305mm x 307mm x 305mm (12.0" x 12.1" x 12.0") and weighing 8 kg (17.6 lbs), the IDS108 sub employs a single 8" long excursion Neodymium driver. The perfect partner to the ID14, the IDS108 is also available in touring and install versions, extending LF down to 50Hz.

IDS108-I

IDS108-T

Plug & Play Power and Processing

A choice of compact, cost-effective 4-channel amplification and processing solutions feature phase-coherent presets for all directivity versions of all ID Series speakers.

NXAMPMK2

With DSP presets for all directivity versions of ID Series cabinets and subs, NEXO powered controllers make it easy for designers to create the perfect ID Series system for every application or installation.

NXAMPMK2

The result of a close collaboration between NEXO and Yamaha and available in 4 x 1300 Watts, 4 x 2500 Watts and 4 x 4500 versions, NXAMPMK2 is the perfect, light weight, 'Plug & Play' power and control solution for larger ID Series systems. NXAMPMK2 features 4 x ultra-low distortion Class D amplifiers and PFC technology, with all essential parameters accessible via a large colour touchscreen on the front panel.

DTD/DTDAMP

Ideal for powering fixed installations of NEXO ID Series systems, the 4-channel, 1U rack-mounting DTDAMP is available in two versions: 4 x 700 Watts and 4 x 1300 Watts. The DTDAMP partners perfectly with Touring and Installation versions of NEXO's DTD Controller to create a compact, light-weight, intelligent powering and control solution that's easy to configure and operate.

DTD-T touring version

DTD-I install version

System Design and Control

A comprehensive suite of software applications for designing, controlling and monitoring ID Series systems.

NXAMPMK2's native dual Ethernet card facilitates remote control and daisy-chaining of amplifiers and seamless integration with NEXO's NeMo amplifier management software, with optional Dante, EtherSound and AES network cards also available. NXAMPMK2 can also be controlled directly from Yamaha digital mixing consoles and is included in Yamaha's ProVisionaire control and monitoring software for installed systems.

ProVisionaire

An intuitive drag and drop interface includes ID Series and other all NEXO systems and sub bass cabinets, with measured speaker data processed along with complex mathematical data to predict SPL and delay coverage in 3 dimensions. NS-1 combines full acoustical and mechanical computations along with tools for optimising curved vertical array design. A Help section defines mechanical constraints to establish flown system safety, and generates reports for system dimensions, weight, gravity centre position, forces, moments, working load and safety factors.

Installers are also invited to use NEXO's free System Design service. Visit nexo-sa.com/design for more information.

NeMo

System Management and Remote Control solution for networked NEXO Powered TD Controllers

Available to download free of charge, NS-1 is a powerful and intuitive system configuration and simulation tool enabling NEXO users to configure and optimise the performance of any NEXO system by predicting its behaviour in any venue to ensure uniform SPL coverage.

Construction	Water-resistant Polyurethane			Finnish birch plywood	
Finish	White: Structural paint Black: Raw sandblasted polyurethane		A la carte	Black structured paint	
Front Finish	Stainless steel Acoustic fabric, black or white	Stainless steel Black paint	A la carte		
Operating temperature range	0°C - 40 °C (32° F - 104° F)			0°C - 40 °C (32° F - 104° F)	
Storage temperature range	-20 °C - 60 °C (-4 ° F - 140° F)			-20 °C - 60 °C (-4 ° F - 140° F)	
Height x Width x Depth	132 x 309 x 23 3mm (5.2" x 12.2" x 9.2")			285 x 525 x 550 mm (11.2" x 20.7" x 21.7")	
Weight: Net	6 Kg (13 lbs)			21kg (47 lbs)	
IP Rating	IP54	IP2X		IP2X	

System Operation
