

Geo  
M6

HIGH POWER-TO-SIZE RATIO

# FILL THE SPACE WITH SOUND NOT SPEAKERS

The highest possible output from the smallest possible cabinet. It makes NEXO speakers less obtrusive and easier to transport, rig and install.

Measuring less than 38cm wide, GEO M6 delivers NEXO's signature smooth frequency response for a highly musical performance and enhanced speech intelligibility, with focussed dispersion for consistent coverage.

Whether you're rigging a mobile A/V application or installing a fixed system in a theatre, bar or club, NEXO helps you fill the space with sound, not loudspeakers.
