# ID Series Compact Sound Reinforcement System

ID24t - Touring version

ID24i - Install version

### **Key Features**

- Compact, high-powered sound reinforcement speaker
- Measures just 309mm W x 132mm H x 233mm D
- Rotatable horn for 120° x 40° or 40° x 120° HF coverage
- Dedicated Install and Touring versions
- 'A la carte' options allow specifier to choose HF directivities, mounting type, connectivity, cabinet colour and grille type
- Compact, low-profile subs also available

## System Applications

- Ceiling or wall mounted, horizontally or vertically
- Under balcony in theatres
- Stage front-fill
- Pole-mounted
- Flown in a touring system
- Wedge monitor

With a unique user-rotatable horn that lets users quickly select between 120° x 40° or 40° x 120° HF coverage, ID24 brings unparalleled flexibility to the world of compact speakers with a cabinet that delivers trademark NEXO sound and performance, whether mounted horizontally or vertically.

Measuring just 309mm wide, 132mm high and 233mm front to back, the ID24 uses twin 4 inch drivers in a V formation, and is ideal as a full-range speaker, or as a dedicated 'sound beaming' unit in difficult spaces. Mounted horizontally or vertically, ID24 delivers superior performance in all scenarios.

Three distinct ID24 specifications are available – ID24i for installation, ID24t for touring and ID24c (carte), which allows the perfect speaker to be configured from an extensive list of options. ID24i is 'all-weather' IP54 rated.

ID24i (install spec) features threaded holes for compatibility with NEXO and 3rd-party mounting hardware, including the popular K&M24161 and K&M24471. For rapid installation ID24i is equipped with captive cable for fast, secure connectivity with existing wiring. Install models are available in black or white with a matching fabric grille.

The ID24t (touring spec) features Speakon connectors and quick release rigging points for easy mounting - horizontally or vertically. ID24t is compatible with a range of NEXO and 3rd-party accessories including NEXO's QRV quick release truss mounting hook and QRF quick release adjustable floor stand, as well as K&M's M10-3/8 mic stand mount and 19780 adjustable pole stand.

Touring models are available in black only with a matching steel grille.

For applications that require the greatest degree of customisation, the ID24c enables specifiers to choose from an expanded range of HF directivities, mounting and connectivity options. Cabinets can be spec'd in black, white or any custom RAL colour with matching steel, fabric or foam grilles.

Rotatable horn for variable HF dispersion

ID24 speakers can be mounted vertically and horizontally

# INSPACE DEFINITION

NEXO is one of the world's leading sound reinforcement loudspeaker manufacturers. Founded in 1979, the company is dedicated to crafting practical solutions with solid engineering. Each new design begins with a proprietary sophisticated computer simulation process that allows every parameter to be extensively modeled and simulated, leading to breakthrough cost and performance gains. NEXO's comprehensive product line includes loudspeakers, analogue and digital control electronics and amplification; all designed to deliver consistent sound quality and long term reliability for a broad range of applications.
